

International Rhine River Basin District
Report Part A
K 13.1 Surface water
Ecological state /
potential of the water body – overall

Rhine river basin district	Ecological state *	Ecological potential *
	very good	good and better
	good	moderate
	moderate	poor
	poor	bad
	bad	not classified
	not classified	not classified

Substances relevant for the Rhine and other specific pollutants

- One or more environmental quality standards (EQS) exceeded in the water body

— State frontier

— Boundary of federal state

··· Limit of 1-mile-zone

■ Towns

* current national assessment; coastal waters outside the 1-mile-zone: no classification required. DE-BW: Due to the application of the „Prague approach“ no assessment of the ecological potential. The assessment of FR or of DE-RP is represented along the main stream of the Rhine.
