Instructions for use for the maps accompanying the 1st Management Plan (2009) and the Sediment Management Plan

Clicking on one of the links listed below leads you to a map project:

When opening, the tab „Legend“ will appear in the chosen language. The tab to the left "Topics" will indicate the different topics of the maps (in English). When clicking on the cross, the list of layers (of maps) belonging to a topic will open.

Click into the white boxes to activate or deactivate the different layers. ☒. You may combine different map layers and topics. The "Legend" tab gives further information on the activated layers.

Select the required layers in the "Topics"-layer, and press "Update map" (below, left).

The updated map will appear on the right hand side.

You may send maps per mail ☐ and print them together with the legends and the ICPR logo ; we recommend to do so in landscape format (see toolbar above the map frame).

Maps on the 1st International Coordinated Management Plan for the International River Basin District Rhine (part A = overriding part); December 2009

Topography and soil cover, areas of operation, surface waters, groundwater,
conservation areas, monitoring networks for biology and chemistry, ecological state /
ecological potential, chemical state (water quality)

Maps accompanying the Sediment Management Plan Rhine 2009

Areas at Risk, Areas of Concern, Modified Assessment (after decontamination)

Note: By clicking on the info button ⓘ you can open the data sheets on the different areas. Please click into the centre of the points on the map. To be able to use this function, your browser should accept pop-ups for the page <http://geoportal.bafg.de/iksr> .
